### **Feed Regulatory Modernization**

Dear Laura Scott:

Thank you for the opportunity to provide feedback on the proposed amendments to the Feeds Regulations. KAP is Manitoba's general farm policy organization, providing a unified voice for farmers on issues that affect agriculture.

The comments below highlight a few areas for consideration under the proposed amendments to the Feeds Regulations.

- Ensure that the administrative burden relating to labelling, registration, record keeping is kept to a minimum.
- Minimize the financial impact the proposed regulations will have on on-farm feed manufacturers.
- Set maximum contamination levels for mycotoxins and ergot alkaloids.
- Readjust the permitted tolerance of zinc in feed that would allow for higher levels to prevent diarrhoea in a weanling diet.

Thank you for your consideration. Please contact KAP policy analyst Neil Van Overloop at [neil.vanoverloop@kap.ca](mailto:neil.vanoverloop@kap.ca) should you have any questions.

Sincerely,

Brenna Mahoney  
General Manager, Keystone Agricultural Producers
